EXECUTIVE SUMMARY

Signatory of:

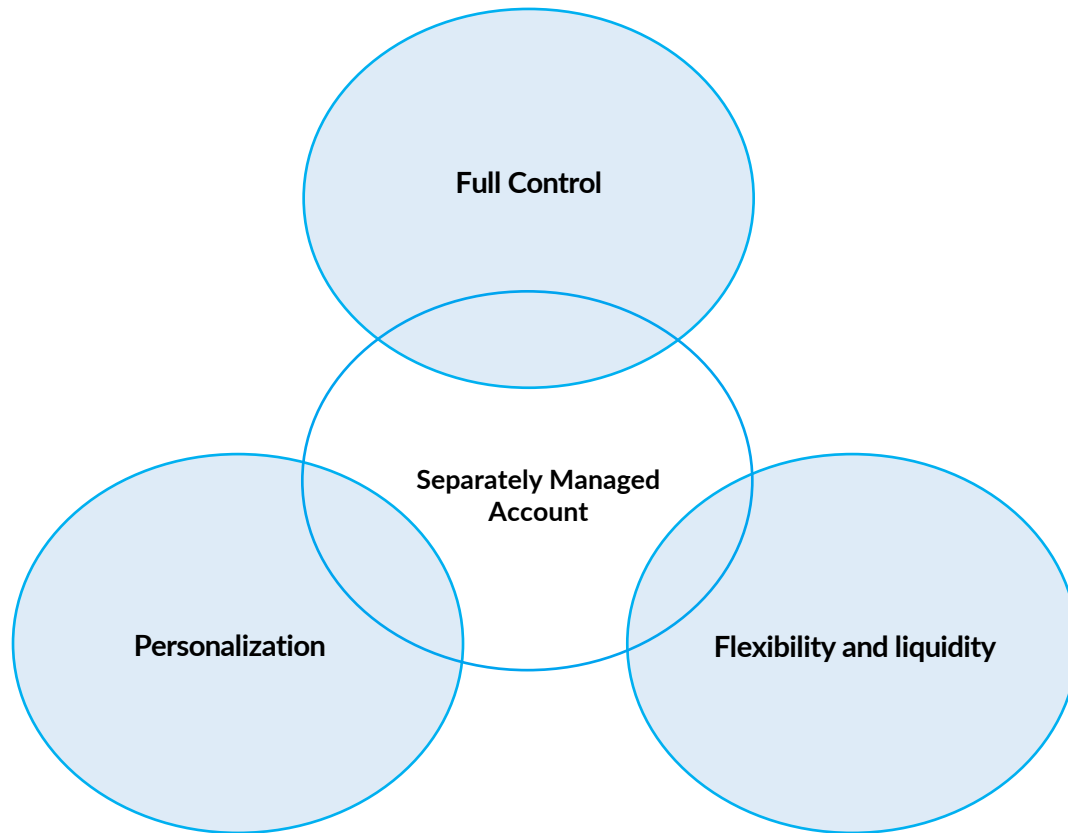

Coban Capital is an innovative data driven Multi-PM Platform, that seeks to build a diversified 'best in class' portfolio of equity managers and consistently annually targeting 21% - 28% performance with a Sharpe ratio greater than 2.5 .

The firm seeks to strictly pursue a diverse array of investment strategies across Equity Long/short , Market Neutral & Merger Arbitrage, utilizing a proprietary risk management process strictly adhering to mathematical and statistical methods.

Coban Capital Institutional Fund, Managed by Arnold Mbai strives to produce risk adjusted returns for investors across a range of proprietary managers.

OVERVIEW

Separately Managed Accounts Benefits

Separately Managed Accounts levels of risk.

In the Separately Managed Account(SMA) format, investors can customise the programs or increase the level of risk we take:

x0.5 This is the most conservative option with lower day to day volatility and drawdowns under 2%.

x1 This is the core program of the underlying team's strategies.

x2 This doubles the core program and the amount of risk and position sizing the program takes. As a result, the returns are doubled.

x3 This triples the core program and the amount of risk and position sizing the program takes. As a result, the returns are tripled.

Custom This can be customised to meet the Separately Managed Account requirements.

Team 1

The Team is an actively managed long-short equity fund that seeks consistent long-term capital growth with low correlation to traditional investment strategies. It seeks to achieve this objective by thematically investing in leaders and beneficiaries of disruptive innovation that reshape the way businesses operate and consumers behave. The manager minimizes market exposure and maximizes alpha by integrating deep fundamental research with advanced quantitative multi-directional trading across various time horizons.

Return Statistics

Summary	Statistics	Summary	Statistics
Maximum Drawdown	-5.08%	Standard Deviation	3.80%
Maximum Month	+16.48%	Sharpe Ratio	2.81
Minimum month	-3.90%	12- Month Net Trailing Return	15.70%
Cumulative Net Return	+586.32%		

Manager Overview

He has over 15+ years of experience managing and refining his long-short equity investment strategy. He draws insight for this strategy from his versatile background. He originally worked for Regeneron Pharmaceuticals, where he cultivated his utilization of the scientific method, fostering a process-oriented approach to decision-making, grounded in rigorous experimentation and evidence-based analysis. As a sell-side trader for institutional clients, he learned how to identify large accumulation/distribution patterns, and how to time the growth cycle stages of top performing stocks. Within the venture capital space and as an entrepreneur, he helped develop, launch, market, and evolve technologically enabled products and services through various growth phases, leading to an understanding of the characteristics of successful products and companies from conception to maturity. Prior to serving as CIO of the strategy, He worked for Merrill Lynch where he managed the growth investment fund for a \$2.1B team portfolio. He graduated from Amherst College with a focus on economics where he played quarterback on the football team. He is responsible for all investment strategy, portfolio construction, and portfolio management.

Team 2

The PM is responsible for the strategy which is based on over a decade of research applying machine learning (ML) to fundamental investing, they apply advanced ML capabilities and modern cloud compute infrastructure to less competitive market segments dominated by human discretionary investing: small-mid market cap , longer-term fundamental predictions (1mo-1y+). It is a fully systematic approach enabling continuous improvement; validation to earn uncorrelated alpha based on fundamentals.

Return Statistics

Summary	Statistics	Summary	Statistics
Maximum Drawdown	-3.35%	Sortino Ratio	3.95%
Maximum Month	+6.36%	Sharpe Ratio	2.39
Minimum month	-0.22%	12- Month Net Trailing Return	23.8%

2023											1.22%	0.36%	1.58%
Annualized Since Inception													22.3%

Team 3

The Long/Short Equities strategy employs a highly selective investment approach, focusing on a concentrated portfolio of carefully chosen stocks. These positions are built upon extensive research to identify companies with strong fundamentals and compelling growth prospects. At the same time, the strategy hedges against broader market risk by taking short positions in indices that are expected to underperform. This dual approach aims to limit overall portfolio volatility, providing a smoother return profile for investors, even during turbulent market conditions. The strategy is designed to achieve steady, double-digit returns on average, aligning with the goal of preserving capital while delivering consistent growth. By actively managing both long and short positions, the strategy ensures a balanced exposure to market movements, mitigating risks while seeking pockets of alpha. The focus on a limited number of stocks enables deep analysis and conviction in each investment, while the use of market hedges protects against broader macroeconomic or sector-specific headwinds. This disciplined approach allows the portfolio to adapt dynamically to changing market environments.

Return Statistics

Summary	Statistics	Summary	Statistics
Maximum Drawdown	-4.32%	Beta	0.30
Maximum Month	5.13%	Sharpe Ratio	5.45
Minimum month	-2.30%	12- Month Net Trailing Return	8.38%
Cumulative Net Return	28.18%		

Manager Overview

The manager is a proud graduate of Eckerd College. He began his career by managing financial operations in his family business. Building on this experience, he has spent the past 7 years successfully running an Absolute Long Only Equities Fund.

To meet client demand for reduced volatility, he developed a proprietary systematic Long / Short Equities Strategy, allowing the use of responsible leverage to maximize returns.

He is currently and independent RIA in the states of Florida and Colorado.

The manager currently lives in Denver with his wife and two children.

Team 4

The manager employs a discretionary global TMT focused all cap equity long/short strategy for both the fund and managed accounts. The basis of the strategy risk management is market neutral by default but can be customized as long only or low net. It is fundamental research driven with a value/contrarian style and intrinsic value based strategy. On the long side the strategy mainly looks for misunderstood stories at or near an inflection point (fundamental, not traditional event driven) with a longer investment horizon (1-3yrs). On the short side it looks for paired trades or individual short ideas with goal of being somewhat subsector neutral on the fundamental driver basis with shorter investment horizon (avg. 6mon). The research and idea generation process is mainly based on primary research with the focus being on the technology and sustainable competitive advantages of the business rather than near term numbers.

Return Statistics

Summary	Statistics	Summary	Statistics
