

AMONT PARTNERS

Amont Partners Absolute Return Fund

January 2026

strictly confidential

The information presented herein is not an offer to sell or solicitation of an offer to buy an interest in the Amont Partners Absolute Return Fund and must be supplemented by an Offering Memorandum ("the Memorandum") when considering an investment. An investment may be made only after receipt and review of the Memorandum and execution of certain agreements. There can be no assurance that the Fund will achieve its objectives or not incur losses.

Disclaimer

This material does not constitute an offer or the solicitation of an offer to purchase an interest in Amont Partners Absolute Return Fund LP (the “Fund”), which such offer will only be made via a confidential private placement memorandum (the “Memorandum”). An investment in the Fund is speculative and is subject to a risk of loss, including a risk of loss of principal. There is no secondary market for interests in the Fund and none is expected to develop. No assurance can be given that the Fund will achieve its objective or that an investor will receive a return of all or part of its investment. All statements herein are qualified in their entirety by reference to the Memorandum, and to the extent that this document contradicts the Memorandum, the Memorandum shall govern in all respects.

This material is confidential and may not be distributed or reproduced in whole or in part without the express written consent of Amont Partners LLC (the “Investment Manager”). This material is not intended to provide, and should not be relied on for, tax, legal, or accounting advice. You should consult your own tax, legal, and accounting advisers before engaging in any investment transaction.

The performance data discussed herein do not represent the performance of the Fund, but rather, represent the unaudited performance of selected portions of the portfolio of Stone Forest STEMM Fund, LP that were partially managed by Rob Li, Principal of the Investment Manager. Although the results discussed herein were produced using the same investment style that is used for the Fund, the results shown were achieved utilizing a team that, with the exception of Rob Li, will not be part of the Fund’s investment process. For this reason, no representation is being made that the Fund is likely to produce results that are similar to those shown. The results shown reflect the deduction of: (i) an annual asset management fee of 1.5%; (ii) a performance allocation of 17.5% of net profits above to a 5% “hurdle” and a “high water mark;” and (iii) transaction fees - actually incurred. The management fee and performance allocation were applied retroactively and do not reflect actual fees charged. None of the results shown reflect the deduction of certain organizational and operating expenses common to investment funds, which would serve to decrease profits or otherwise increase losses.

Results are compared to the performance of the S&P 500 Index (the “Comparative Index”) for informational purposes only. The Fund’s investment program does not mirror the Comparative Index and the volatility of the Fund’s investment program may be materially different from the volatility of the Comparative Index. The securities included in the Comparative Index are not necessarily included in the Fund’s investment program and criteria for inclusion in the Comparative Index are different than criteria for investment by the Fund. The performance of the Comparative Index reflects the reinvestment of dividends, as appropriate.

This material contains certain forward-looking statements and projections regarding the Fund’s investment strategy and the future asset allocation of the Fund, including indicative guidelines regarding position limits, exposures, position sizing, diversification, and other indications regarding the Fund’s strategy. These projections and guidelines are included for illustrative purposes only, are inherently predictive, speculative, and involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. The guidelines included herein do not reflect strict rules or limitations on the Fund’s investment program and the Fund may deviate from the guidelines described herein. There are a number of factors that could cause actual events and developments to differ materially from those expressed or implied by these forward-looking statements, projections, and guidelines, and no assurances can be given that the forward-looking statements in this document will be realized or followed, as described. These forward-looking statements will not necessarily be updated in the future.

The investment case studies shown herein are presented for informational purposes only. The case studies shown are included to illustrate the application of the Investment Manager’s “data blind spot” investment methodology. It should not be assumed that recommendations made in the future will be profitable or will perform similarly to those case studies discussed herein.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS.

***“Not everything that counts can be counted,
and not everything that can be counted counts”***

- Albert Einstein

Executive Summary

Amont Partners Absolute Return Fund is a global fundamental long/short equity strategy that applies a proprietary “*Data Blind Spot*” investment framework to capture structural, idiosyncratic alpha that machines cannot detect

Unique “*Data Blind Spot*” framework to capture idiosyncratic alpha that machines cannot address

- Focus on qualitative inflections that cannot be measured by hard data
- Leverage manager’s global, cross-asset expertise to arbitrage cross-region mispricing neglected by specialists
- Private Equity-like concentrated, low-turnover, tax-efficient portfolio

Focus on downside protection & circle of competence

- Conservative use of leverage
- Rigorous risk management and exit discipline
- Focus on small/mid-caps in three sectors: tech, consumer and industrials

Experienced principal with solid track record

- Extensive private & public investing experiences across US & Asia
- Professional experiences include Stone Forest Capital (partner & founding member), Slate Path Capital (tiger cub), and Morgan Stanley Private Equity
- Achieved double digit annualized net from 4Q15 through 2022 at prior firm utilizing the same strategy

Resilient Performance without Using Leverage

Quant Explosion Creates Massive Mispricing

- Quants have come to dominate equity market trading volume in the last fifteen years
- However, machines cannot evaluate long-term, qualitative inflections not yet captured in short-term, measurable data (e.g., strategy shifts, management changes, secular trends, cross-market dynamics), hence creating a massive alpha pool for patient investors
- The strategy aims to capitalize on this structurally growing opportunity set of “data blind spots” inaccessible to machines

Source: JPMorgan, Goldman Sachs

Proprietary “Data Blind Spot” Framework

The strategy focuses on three “Data Blind Spot” themes that machines cannot address

Data “Desert”

No measurable data available for machines to analyze

- Strategy shifts
- Business model transformation
- Mgt/incentive change
- Secular disruption

Data “Galapagos”

Machines neglect stocks in different markets that share similar drivers.

- Cross-region arbitrage
 - EM-driven DM plays
 - DM-driven EM plays
- Cross-sector arbitrage

Data “Iceberg”

Machines miss long-term, big-picture implications of data

- Overstated ST impact
- Understated LT impact
- Neglected, less obvious plays on value chains of “hot themes”

3M Investment Criteria

Ideas derived from three “Data Blind Spot” themes must meet the “3M” criteria to enter portfolio

Key Criteria

- Monopolistic/oligopolistic market positioning
- High cost (time & financial) for new entrants to “replicate” business
- Solid & consistent ROIC
- High operating leverage
- Diversified client base
- Limited technology disruption risk

Key Criteria

- Incentives aligned with minority shareholders
- ROIC and total shareholder return-driven key performance indicators (KPIs)
- Meaningful ownership stake with no outside personal businesses
- Rational capital allocation process with clearly defined IRR hurdle

Key Criteria

- Mispricing/fundamental inflection cannot be captured by quants
- Time lag between fundamental inflection taking place and being reflected in hard data

Efficient Idea Generation/Filtering Mechanism

Disciplined Investment Process

Idea Generation

- Investable universe
 - Only focus on ideas in three “data blind spots” themes
 - Target universe of <5 day liquidity (long) and <1 day liquidity (short)
- Idea generation mechanism
 - Monitoring “focus list” of ~200 targets that manager knows well
 - Regular catch-up with key value chain experts cultivated on select secular trends, such as digital transformation, future of work, automation, virtual life
 - Industry publications and journals
 - Investment/ industry conferences and trips

5-Step Research Process

- Step 1: Why does mispricing exist in this security?
- Step 2: What’s the source of my variant view that is unavailable in measurable data?
- Step 3: How will the market be persuaded?
- Step 4: What’s the absolute upside/downside potential and risk/reward ratio?
- Step 5: Pre-mortem signposts/checklist

Fundamental Due-Diligence

- Deep-dive on “3Ms”: Moat, Management and Mispricing
- Study capital, ownership and incentive structures
- Build and maintain detailed financial projections

Methodical Portfolio Construction & Risk Control

Portfolio Construction

- 10-15 longs, each with 5-8% starter position
- 20-25 shorts, each with 2-2.5% starter position
- Target average gross exposure of 110-130%, net exposure 30-50%
- Target average holding period of 18+ months

Exposure/Concentration

- Market exposure:
 - Gross exposure <150%; net exposure <60%
- Single name starter position <15% of NAV
- Single name max exposure <30% of NAV

Macro/FX Risk

- Currency hedging is default for positions
- Monitor significant shift in regional macros and repatriation limitation

Entry/Exit Discipline

- Pre-established “signposts” / fair-value targets for entry/exit of every position
- Consistent, documented portfolio action procedures
- Timing of portfolio action determined by:
 - Qualitative inflection being captured in hard data/stock performance
 - Triggering of pre-established price target & exposure parameters
 - Presence of more attractive alternatives

Short Book Delivered Substantial Alpha

- Expertise in engaging press & media to generate short alpha
 - Motivated and assisted **WSJ** to publish **“Chinese Water Accounting is Slippery When Wet”** (12/14/15) that challenged Beijing Water (371 HK)’s aggressive accounting practices
 - Generated 40% absolute return in three weeks from this activist short
 - Company was forced to abandon dubious accounting practices in 2016

Experienced Principal

Rob Li – Managing Partner

Rob has over a decade of investing experience across private and public markets in the Americas, Asia, and EMEA. He was a Partner and Managing Director of Stone Forest Capital, a New York-based global fundamental equity investment firm with roots in Neon Liberty/JPMorgan Asset Management. Previously, Rob was a public equity consultant at Slate Path Capital, a Blue Ridge Capital spinoff with roots in Tiger Management, and a private equity investor at Morgan Stanley's Private Equity Group. He began his career as an investment banker at Credit Suisse.

Rob serves on the Harvard Business Review Advisory Council and is a member of the Milken Young Leader Circle, the Skybridge Young Leaders Council, and the Asia Society Asia21 Initiative. He is also a guest lecturer at Gabelli School of Business at Fordham University as well as the University of Colorado's Business School.

Rob holds a dual-BA in History and International Studies with distinction from Yale College, where he was a Heinz Scholar and served on the varsity pistol shooting team. He also holds an MBA from Columbia University.

Key Terms & Service Providers

Summary of Terms

Fee structure:

- Management fee: 1.75%
- Incentive allocation: 20% with 5% hard hurdle
- High-water mark

Liquidity

- 1-year lock
- Quarterly liquidity with 25% investor level gate
- 60-day notice

Subscription

- Minimum: US\$1MM

Key Service Providers

- Auditor: Deloitte
- Administrator: NAV Consulting
- Prime Broker: Jefferies
- Custodian Bank: JP Morgan
- Legal: Davis Gillett Mottern & Sims
- Outsourced CFO/COO: IQEQ

- “Data Blind Spots” Case Studies

EPAM (LONG): Data Lagged Fundamentals

Business Description

- EPAM Systems is the world's largest pure-play digital transformation consultancy servicing Fortune 500 clients' consumer-facing IT needs (such as mobile apps and metaverse projects)
- Boston-based EPAM historically had 60%+ staff engineers based in Ukraine given high technical proficiency & low-cost

Unique Diligence Performed

- Interview with key customers to understand why they're not moving away from EPAM, and the transition time and hurdle to clear if they have to leave EPAM
- Interview with ex-war zone hiring managers to better understand ex-war zone hiring pace and if it's sufficient to offset capacity loss inside war zone

What did Machines/Data Miss?

- Ukrainian War broke out on 2/24/22, and stock promptly tank 70% as machines "know" that EPAM has two thirds of staff in the war zone (EPAM discloses this data)
- Machines did not know, however, that EPAM started staff contingency plan before the war and already secured living quarters/co-working space for staff to work in neighboring countries (Poland, Romania, Turkey)

Insights & Investment Actions

- One month into the war, EPAM only lost ~15% of effective capacity vs machines' assumption of 60%+; and zero clients left
- Hiring outside the war zone jumped and delivered 20%+ firm-wide growth in 2022
- Built EPAM into top long position in Mar 2022 given compelling risk/reward produced by "data blind spots" of machines

Giant Bike (SHORT): Disruption Missed by Data

Business Description

- Giant Bike is the world's largest bicycle ODM/OEM manufacturer and a key partner for majority of high-end bicycle brands
- Giant is renowned for its products' quality, and has historically been a darling stock for investors hoping to gain exposure to secular biking sports growth in China/Asia

Unique Diligence Performed

- Interview with local VCs that highlighted bike-sharing is not a short-term fad but rather a multi-year boom given massive influx of capital during 2016-2018
- Interview with major bike-sharing tech startups that highlighted Giant's inability/unwillingness to work with them given low margin profile and burdensome customer support requirement

What did Machines/Data Miss?

- Bike Sharing came out of nowhere in China since 2H15 and quickly caught fire, even though Giant brushed it off as a "3 month-fad"
- Machines continued to like the "healthy" sales data of Giant through 3Q15, and completely missed the disruption Bike Sharing was going to unleash unto Giant's China sales numbers in the next two years

Insights & Investment Actions

- Bike Sharing "bubble" would eventually explode, but not until early 2018
- Refusal to face this disruption cost Giant Bike two years of sales performance
- Built short position in Giant since late 2015 through the bike sharing "bubble" period given compelling risk/reward produced by "data blind spots" of machines
