Fund Strategy

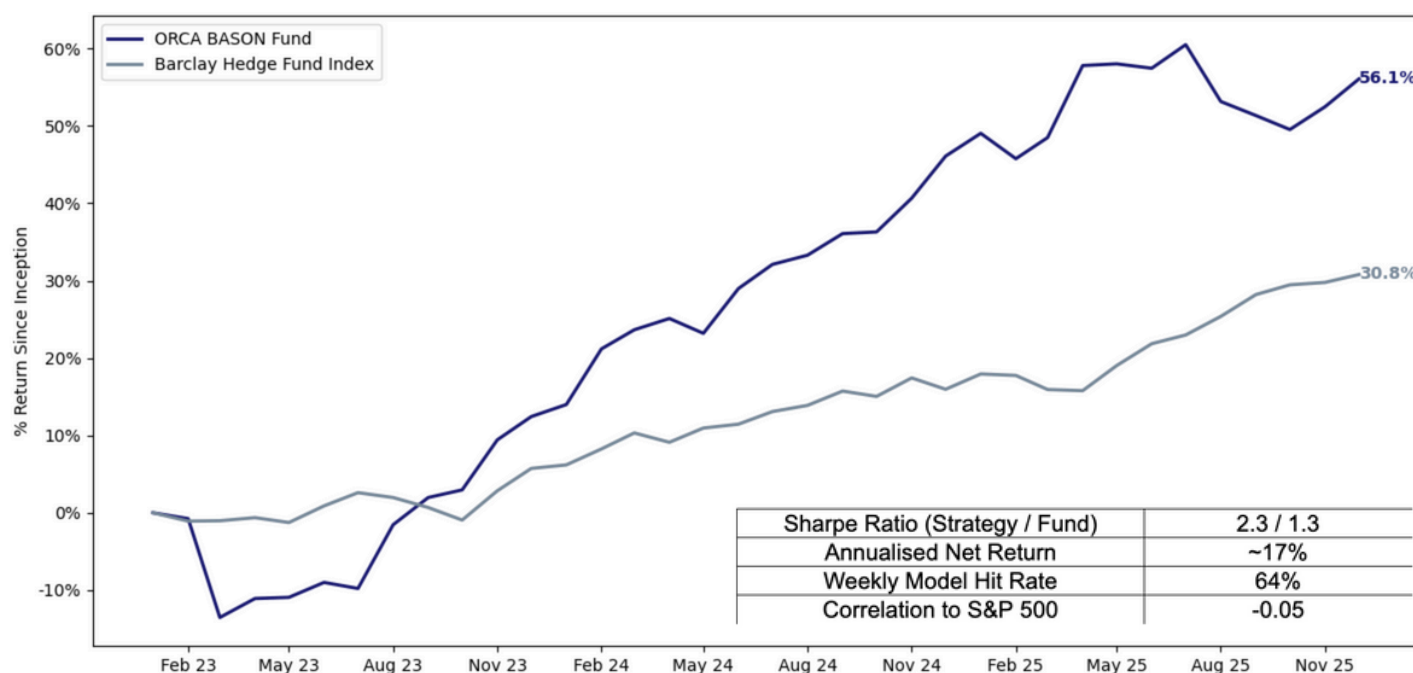

The Oraelum Capital BASON Fund applies behavioral psychology to drive weekly market predictions. Our proprietary BASON model extracts sentiment and groupthink narratives from competitive crowd surveys, using this to generate a weekly directional signal for the S&P 500. The Fund then trades this signal via 2DTE and 0DTE SPY options, using derivatives to generate high-Sharpe, low correlation returns. The BASON Fund is fully systematic, uses no leverage or derivative shorting, and caps risk at 2% per week. The Fund seeks to deliver portfolio diversification through uncorrelated, behaviorally-driven alpha.
